JUAN JOSE
ARCANI HUANCA
Software Engineer

TECHNICAL SKILLS

Programming: C# | JavaScript | HTML/CSS | Bash/Shell/ PowerShell

Frameworks/Libraries: .NET | ASP.NET Core | SignalR | Entity Framework Core | Xamarin | RabbitMQ | Dapper | Redux | CQRS | MassTransit | React | TypeScript

Databases: Microsoft SQL Server | MongoDB

AI: Claude Code | Cursor AI | Copilot **|** Custom Agents & skills | Context/token optimization

Testing: xUnit | Integration testing

Version Control: Git | GitHub | GitLab | Bitbucket | AzureDevops | AWS Lambda

Tools: VisualStudio | VSCode | Docker | Postman | Jira | Trello

EXPERIENCE

Jalasoft | Backend Developer (Dec 2023 - Aug 2026)

- Added compatibility for New Outlook desktop alongside Outlook classic in a client integration tool
- Diagnosed and fixed Android app issues around incorrect data output and offline connectivity
- Refactored a core MRP feature and proposed solution improvements
- Fixed layout/overlap bugs in a PDF/print reporting module
- Built and maintained an integration test suite, adding coverage to existing features and setting up the process for new ones
- Used Claude Code and Cursor for code generation, bug diagnosis, and test writing — increasing ticket throughput
- Built custom AI agents and skills to handle recurring workflow tasks, and tuned context/token usage for cost efficiency
- Took ownership of onboarding and training new developers, including AI-assisted workflows
- Introduced version control for internal client documentation

Jalasoft | Fullstack (Sep 2023 - Dec 2023)

- Integrated facial-detection library to calculate attendance percentage from webcam feed
- Added role-based validation to API endpoints
- Resolved UI bugs across the client application

About me

Software engineer with 3+ years of experience in .NET/C# and SQL Server, building production systems for ERP, banking and real-time communication platforms. I refactor core features safely and build integration tests that keep them stable. I use Claude Code and Cursor daily, build custom agents and skills for recurring team tasks, and focus on AI-powered backends with React/ TypeScript on the front. I enjoy mentoring: I've onboarded new developers and run technical interviews.

EXPERIENCE

Banco BCP | Fullstack (Feb 2023 - Sep 2023)

- Support for React and .NET applications
- CI/CD with Azure DevOps
- Maintenance of legacy projects
- Implementation of AWS Lambda functions
- JWT authentication
- System documentation
- API documentation with Swagger

Banco BCP | Cuentas Premium

- Migration from .NET Framework to .NET 6
- Usage of Basic Auth and JWT authentication
- Document generator and template updates
- Separation of concerns between layers
- API documentation with Swagger and Postman

Jalasoft | Backend (Internship) (Oct 2022 - Feb 2023)

- Shadowed a development team on a warehouse simulation and debugging tool, working on one module under a mentor who assigned code review tasks.
- Focused on backend and business logic of a microservices module deployed with Docker containers.
- Identified design patterns in the module and applied them in a refactoring.

Fundacion Jala | Scholar (May 2022 - Sep 2022)

- Completed an intensive training program (cohort of 18 students) in C# backend development, JavaScript frontend and DevOps.
- Practiced through coding exercises, mock interviews and team mini-projects, plus sessions with a manager on remote work.
- Built a final team project: an applicant tracking system.

EDUCATCION

Universidad Mayor de San Andres - Facultad de Tecnología
Electrónica and Telecomunicaciones (Licenciatura) (Título Profesional)

2013 - 2018

Centro Boliviano Americano (CBA)
Diploma of Proficiency in English

2018 - 2019

Michigan Language Assessment ECCE
English proficiency level B2

2019

Confuccius Institute Headquarters
Chinese Proficiency Test
HSK(Level 1)

2019

EXTRAS

Mentor U Buddy Program Jalasoft (May 2025– Nov 2025)

- Mentored a Jala U intern through the University Buddy program, supporting their professional and personal growth.

Gobierno Autónomo Municipal de La Paz 2021

- Facilitación y Moderación Recorrido “Cultura Científica 2021”
- Expositor “Electrónica y Microcontroladores”
